

# CRYPTOCURRENCY

## 101

workshop series

What are all these coins?

# What is an alt coin?

Alternative cryptocurrencies launched after the success of Bitcoin

# Why do we need altcoins?

Bitcoin is only designed to be a form of electronic money

There can only be 21 million bitcoins

Bitcoin is mined using lots of computing power

Produced every 10 mins

Need more computing power to mine Bitcoin

# Why Altcoins?

As you can see, Bitcoin has many rules

Altcoins' creators come up with its own rules and functions

Litecoin for example is the same thing as Bitcoin, but just more coins created- new coin is created every 2.5 minutes.

# Examples of Altcoins

Ethereum- Smart Contract

Zcash- Bitcoin with some anonymity, still published but sender, recipient, and amount are hidden

Monero- Confidential transactions

Kucoin- HK trading platform that made its own coin with daily dividends

Red Pulse- Built on Neo for China

NEO- Ethereum of China

Litecoin- Same as Bitcoin but coins are created faster

Steemit- Write on Steemit and get this coin

Bitconnect- lending bot

# CHOOSING YOUR FAVORITE CRYPTOCURRENCY
